

acp The Orange County Chapter Presents

# Developing & Implementing Business Continuity Standards

Jackie will discuss the importance of business continuity standards, how to develop a standard, who should be involved in the process, and how to integrate them into your organization. She will focus on what standards need to be implemented and the needed content using a generic template. Handouts will include a copy of the presentation and the template.

Jackie Woods, Project Manager, Southern California Edison

## Elevating Your Career in Business Continuity

### Assess Your Marketability and Formulate a Career Path

The economic and employment environment is unstable for most of us. Learn from Zoey how to leverage your marketable skills, about the impact of certification, and trends within the industry. She will also discuss the results of the annual BC Management Survey.

Zoey Boyles, BC Management
